EX250 (1988-2012)

Xi San saved the life of a mysterious girl one night in his ravaged San Francisco neighborhood. He can’t get her out of his mind, but believes that she’s lost to him. Lin Kwan came to America to bring her scientist father Chinese medicinal herbs, hoping to stop the virus that killed most of the world’s Caucasians before it mutates to infect the rest of the world. On her way to finding him, she meets again the man who once saved her, a man she can’t forget. With a diverse group of fellow travelers, they head for St. Louis, where civilization is being rebuilt. Between them and safety, danger lurks—Gabriel, a self-styled religious leader and white supremacist, who has organized his army from Upper Midwest survivalist and militia followers, determined to take revenge for the white man. But Gabriel isn’t their only enemy. Before they reach their destination, they will battle nature, prejudice and even those hidden among them who wish their destruction.

The urge to experiment and create has been strong in humankind since time immemorial. So, too, has the need to gather together for the greater good. Makerspaces, where innovators meet to advance technologies through physical computing, answer the call of both these motivating factors. Once a wave of the future, makerspaces are quickly becoming a fixture in the here and now. This books lets students discover where to find, and how to make the best use of, these creative spaces.

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

Our 1973 motorcycle ride took us from Beatrice, Nebraska, to Philmont Scout Ranch in New Mexico, Albuquerque, Phoenix, San Diego, LA, Vacaville, Lake Tahoe, Denver, and then back to Nebraska. We were teenagers, and we had relatives, friends, acquaintances, and girlfriends to see all along the journey. Some nights we camped out, others we stayed in a friend's travel trailer, and some nights we enjoyed regular beds and access to a swimming pool. Each of us rode a 350cc two-stroke motorcycles on the 3500-mile trip. We had no cell phones, roadside assistance insurance coverage, custom ear plugs, or sound systems. The early 70's was different than the 60's, but not that much different. The attraction of the open road and the Pacific Ocean was very powerful. None of us were worried about breaking down or the costs of the trip. We had to go see western America. And we did.

Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

That tradition continues with the fully revised and updated 19th edition of Etiquette. Emily Post's Etiquette incorporates an even broader spectrum of issues while still addressing the traditions that Americans appreciate, including: Weddings Invitations Loss, grieving, and condolences Entertaining at home and planning celebrations Table manners Greetings and introductions Social media and personal branding Political conversations Living with neighbors Digital networking and job seeking The workplace Sports, gaming, and recreation Emily Post's Etiquette also includes advice on names and titles—including Mx.—dress codes, invitations and gift-giving, thank-you notes and common courtesies, tipping and dining out, dating, and life milestones.
